LETTER FROM THE CEO

Twenty-twenty was an unprecedented year of upheaval – our families, communities, and industry faced new and daunting challenges and uncertainty. Through a worldwide pandemic, disastrous storms, and trade wars, our industry remained agile and resilient, seizing every opportunity to play our part in the nation’s public health response, while working to stabilize business and propel the industry forward.

Our 2020 annual report highlights how your team at Growth Energy remained steadfast in our efforts to ensure that our industry’s needs and priorities were top of mind among regulators, our elected officials, and even on the campaign trail. Thanks to these efforts, I’m proud to say that no other industry is in the same position to revitalize rural America in the wake of COVID-19 or rebuild America’s agricultural supply chains.

Our top priority during the pandemic remained constant – to support our producers, their staff, and their communities. When many in the industry were forced to go offline, we pressed lawmakers for assistance. When there was a shortage of hand sanitizer, we helped navigate evolving regulations so our members could make meaningful contributions during an unprecedented time. We showed Washington that America’s ethanol industry is not only “essential”, but an unsung hero in the effort to slow the spread of the virus.

We also held elected leaders accountable to commitments made before the pandemic, demanding that Washington stand with U.S. biofuel producers and reject illegal small refinery exemptions (SRE). As a result, in a long-overdue win, the White House directed the U.S. Environmental Protection Agency (EPA) to reject a raft of retroactive exemption requests – known as “gap-year” petitions. We worked diligently to stabilize the industry and accelerate its recovery – an effort that continues as drivers return to the roadways.

Despite some of the challenges we faced, the trend lines guiding our growth remain promising. The road to recovery is clear, and we are well-positioned to return back to a thriving marketplace, with an expanded retail footprint for E15 and a renewed focus on lowering our nation’s carbon footprint. To achieve that vision, we will work to educate newly elected officials in Congress and the administration, and continue to push our longtime champions, especially on the climate and human health benefits of biofuels. We will also be taking those two messages directly to consumers. Higher biofuel blends are the future, and rising demand for biofuels will drive climate solutions and rural growth for years to come.

So, on behalf of the Board of Directors and the entire team at Growth Energy, thank you for standing with us as the most vibrant and diverse ethanol trade association in the country. Together, we will press ahead on every opportunity, at home and abroad, to advance our shared vision through 2021 and beyond.

Sincerely,

EMILY SKOR

CEO, Growth Energy

SHOWCASING OUR LEADERSHIP

2020: AN UNPRECEDENTED YEAR

WE BEGAN 2020 WITH FORWARD MOMENTUM —

a 2020 Renewable Volume Obligation (RVO) that accounted for SREs, White House commitments to further embolden our E15 trailblazing, and a Phase One China trade deal that promised ethanol and distillers' dried grains with solubles (DDGS) purchases. Then suddenly the global pandemic led to plummeting fuel demand, which compounded existing industry pain. We ended the year producing 13.95 billion gallons of ethanol, 11.7% below 2019 production.

While maintaining focus on our market-building priorities, Growth Energy acted swiftly to help industry cope with the immediate crisis. We recalibrated our advocacy and messaging around our needs to get on the road to recovery, which included policies to: stabilize the industry, follow through on the administration's promises, and build demand.

Our external communications and public affairs highlighted the dire impact of COVID-19 on rural communities and leveraged the administration's broken promises and unfulfilled actions to drive a wedge between Republicans and Democrats, elevating ethanol to the national political stage and inserting it into the forefront of key Midwestern congressional races. Additionally, we stressed to Congress and the media the essential role that co-products from ethanol production play in the ag supply chain and our nation's economy – including CO₂ for dry ice, beverages, food storage and water treatment – as well as high protein animal feed.

- ✓ **12 CONSECUTIVE WEEKS** of all-member calls and updates
- ✓ **New COVID-19 RESOURCES PORTAL**
- ✓ **New ETHANOL DATA HUB** launched
- ↓ **At its lowest point, HALF OF THE U.S. ETHANOL INDUSTRY** was offline
- ↓ **9.8% DECLINE** in exports from 2019
- ↓ **11.7% DECLINE** in ethanol production from 2019

2020 ELC

Growth Energy CEO Emily Skor laid out our organization's vision for 2020 and beyond, where "we envision a future without barriers in the marketplace. Where infrastructure nationwide supports all ethanol blends. Where policymakers globally lean in on ethanol, embracing it as a solution to climate change. And where consumer confidence in ethanol soars to new heights."

2020 FEW

Skor said in her keynote to the 2020 Fuel Ethanol Workshop (FEW) that while industry had to be agile during the pitfalls of COVID-19, we remained on course for our 2020 vision and have stayed true to our mission of positioning biofuels as the future of clean transportation fuels. She also rallied viewers to continue pushing EPA to reject any small refinery exemptions that are not in accordance with the law and to apply the 10th Circuit ruling nationwide.

STAYING CONNECTED

2020 EXECUTIVE LEADERSHIP CONFERENCE

In Key Biscayne, Fla., Growth Energy held its 11th Annual Executive Leadership Conference (ELC), themed "20/20 Vision". Over 350 of the nation's top ethanol industry leaders and innovators joined us for three days of discussions, networking, and charity events, and Growth Energy hosted our first annual ELC Technical Executive Forum.

Attendees received updates from industry experts on expanding consumer access to Unleaded 88, growing the global ethanol outlook, forging a unified industry voice, and ensuring a low carbon future with ethanol fuels.

FUEL ETHANOL WORKSHOP & BIOFUELS SUMMIT

Given the ever-changing landscape of 2020, this year's Fuel Ethanol Workshop virtual keynote address could not have been a more timely opportunity for CEO Emily Skor to address attendees. In September, days after EPA rejected 54 gap-year SREs, Skor spoke to hundreds of virtual participants about the state of the industry and the road to recovery.

Growth Energy's first-ever fully virtual Biofuels Summit was a resounding success, with 60% of survey participants saying our virtual event was the best virtual event of the year. The general session provided members with an exclusive update on market development efforts, our legal and government affairs strategy, as well as a conversation with our CEO and Board Chairman Dan Sanders. Over 150 of our members met via Zoom with 87 congressional offices spanning 15 states.

Leading up to the summit, Growth Energy's communications team released one-on-one video conversations between CEO Emily Skor and 10 Members of Congress, which had a total of over 15,000 organic views across Growth Energy's social media platforms. This provided an invaluable opportunity to showcase our organization's relationship with key champions in Congress, but also for our members to hear directly from elected officials on issues that matter most.

Growth Energy CEO Emily Skor talks to Sen. Amy Klobuchar (D-Minn.) as part of the video series "Conversations with Biofuels Champions."

"I hope, more than anything in the world, we are all back to in-person, soon. That being said, Growth Energy has all of this perfected. From Fly-Ins to the Biofuels Summit, to the Executive Leadership Conference, NOBODY compares to the efforts and organization of Growth Energy... Keep up the incredible work."

— GROWTH ENERGY MEMBER

MARKET DEVELOPMENT

ACCELERATING MARKET DEVELOPMENT

EXPANDING CONSUMER ACCESS TO UNLEADED 88 IN THE U.S.

Despite the depressed fuel market, retailer confidence in Unleaded 88 (E15) continued to grow in 2020. We saw a 10% growth in retail sites offering Unleaded 88, raising the total sites to 2,300 across the country. We brought on board four new retail partners to sell E15, and two retailers are piloting E15 replacing 87/E10.

The U.S. Department of Agriculture (USDA) rolled out its Higher Blends Infrastructure Incentive Program (HBIIIP) in May, with a commitment of \$86 million in ethanol infrastructure to further accelerate E15 market adoption. In the first round of grants available, we helped our unmatched network of both large and small retail partners secure over \$30 million in grants for over 290 sites selling more than 400 million gallons of gasoline annually.

We launched the video series, "The E15 Expressway: Web Chats with Retailers", where CEO Emily Skor spoke with eight retailers about the value of Unleaded 88 and how Growth Energy was instrumental in their decision to add the higher ethanol blend to their offerings. Skor spoke with Protec Fuel, Casey's, Family Express, Thornton's, Sheetz, and Kwik Trip – many of which were recipients of the original USDA biofuels infrastructure grant program, and received additional funding from HBIIIP in this second round. The series aired on our social media and garnered over 3,200 views.

Growth Energy expanded our market development team, bringing on two new regional development directors in emerging markets, covering the northeastern and western regions. While our growing market development team was limited in face-to-face events with the retail community, they expanded their in person workshops to include online webinars. Over 20 retailers representing more than 50,000 sites participated in six webinars throughout the year, allowing Growth Energy to continue its high level of access to and maintain relationships with retailers.

- ✓ 10% RETAIL GROWTH IN 2020
- ✓ 4 NEW RETAILERS
- ✓ 203 TERMINALS OFFERING E15
- ✓ 2,300 SITES OFFERING E15
- ✓ 95% OF VEHICLES CAN USE E15

EXPANDING OUR MARKETPLACE

NORTH AMERICA

- » U.S.-Mexico-Canada Agreement ratified, reinforcing the importance of free trade with our No. 1 ethanol market (Canada) and our No. 1 DDG market (Mexico)

MEXICO

- » 64 million gallons exported in 2020
- » Extended timeline to revise rulemaking to allow E10 nationwide
- » In-country consultant facilitated access to presidential advisors
- » Helped establish the E10 Coalition with the Mexican Sugar Chamber rallying domestic support for E10
- » Supported a Turner Mason study on consumer savings with E10
- » Hosted four retail workshops with Growth Energy staff, stakeholders, consultants, and U.S. retailers
- » Ongoing advocacy with U.S. Trade Representative (USTR), USDA, Capitol Hill, and the U.S. Embassy in Mexico

CANADA

- » 326.4 million gallons exported in 2020
- » Engaged with Canadian officials, stakeholders, retailers, and industry to support amendments to the proposed Clean Fuel Standard
- » Provided our technical expertise via three industry letters and a webinar with Casey's on successful E15 retail implementation

BRAZIL

- » 199.8 million gallons exported in 2020
- » Held over 25 meetings with U.S. Government officials at USTR, USDA, and the U.S. Embassy to seek free and fair trade
- » Worked with Sen. Chuck Grassley (R-Iowa) and Rep. Darin LaHood (R-III.) to directly engage the Administration on our needs

CHINA

- » Ethanol tariff reduced to 45%
- » 21.2 million gallons exported in 2020
- » Pushed for the inclusion of ethanol and DDGs in the Phase One Trade Agreement with China
- » Participated in 8 USTR/USDA meetings

VIETNAM

- » Ethanol tariff reduced from 20% to 15%

INDONESIA

- » Technical, stakeholder, and political engagement helped lift Pertamina's ban on ethanol imports

JAPAN

- » After years of stakeholder engagement and public comments, Japan raised the gasoline baseline carbon index to create a 46 MG ETBE market for U.S. ethanol

TOP 5 EXPORT MARKETS

	GALLONS EXPORTED	PERCENT OF TOTAL
1 CANADA	326.4 mg	24.4%
2 BRAZIL	199.8 mg	15.0%
3 INDIA	189.6 mg	14.2%
4 SOUTH KOREA	105.8 mg	7.9%
5 NETHERLANDS	77.5 mg	5.8%

FEDERAL PRIORITIES

Growth Energy pursued a robust legislative and regulatory agenda designed to ensure that ethanol is not only the fuel of a rural economic renaissance, but the driving force behind a better future for decades to come. During three fly-ins our members held 255 meetings with Members of Congress to advocate for our top priorities. We facilitated 13 letters from Members of Congress to the White House and 11 letters from industry to call for action on these priorities. We mobilized rural voices to send 8,000 letters and place more than 230 op-eds pressing for action.

UPHOLDING RFS INTEGRITY

As we looked toward recovery, we focused on rallying Growth Energy members, farmers, and biofuels champions in Congress to continue pushing back against abuse of the SRE program.

- » We coordinated the signatures of 93 farm organizations, biofuel stakeholders, and plant managers from across the country, who called on President Trump to “stand up against an urgent threat facing rural communities” and reject oil industry exemptions from the Renewable Fuel Standard (RFS).
- » We partnered with ag and biofuel industry groups in sending a letter to EPA calling on the agency to reject “gap-year” SRE petitions.
- » We coordinated joint media opportunities with National Farmers Union (NFU) and National Corn Growers Association (NCGA) to drive comments to Congress from farmers.

Federally, we secured a number of victories:

- » No new SREs granted in 2020.
- » 54 gap-year SREs were denied.
- » EPA affirmed that no new regulations would be needed to avoid environmental backsliding from the RFS.
- » Rep. Collin Peterson’s (D-Minn.) RFS Integrity Act was included in a clean energy package and passed the House. The package also expanded carbon capture research to include biofuels.
- » USDA was prohibited from sending Commodity Credit Corporation money to oil companies who received SREs.

Sen. Joni Ernst (R-Iowa) visits a plant in Hanlontown, Iowa.

FIGHTING FOR BIOFUELS IN THE COURTS

In January 2020, the 10th Circuit Court of Appeals in Denver issued a unanimous decision that invalidated SREs granted by EPA to three refineries for the 2016-2017 compliance years, ruling that:

- » EPA cannot extend SREs to refineries that had not received SREs continuously in previous years.
- » Any finding of “disproportionate economic hardship” must be tied solely to RFS compliance.

Growth Energy heralded the decision in the press and utilized the court’s recognition of EPA abuse as a powerful proof point against SREs in a series of public statements and ongoing communications with policymakers.

Additionally in 2020, Growth Energy pressed ahead on a number of other significant litigation, including:

- » Filing a brief in support of EPA’s final rule allowing E15 year-round.
- » Fighting the 31 SREs granted for the 2018 compliance.
- » Asking the court to enforce EPA to respond to its 2017 remand of 500 million gallons of improperly waived blending.
- » Pressing EPA on its failure to properly respond to a Freedom of Information Act request on SREs.
- » Fighting in court to get EPA to make up for lost Renewable Identification Numbers (RINs) from past SREs granted after the issuance of RVOs.

11 PRO-ETHANOL BILLS IN CONGRESS

- » **S. 1840:** RFS Integrity Act
- » **S. 3986:** Bill to expedite cellulosic biofuel registrations
- » **S. 4481:** Adopt GREET Act
- » **S. 5050:** Renewable Fuel Infrastructure Act
- » **H.R. 2059:** Bill to make permanent the second generation biofuel producer credit
- » **H.R. 3006:** RFS Integrity Act
- » **H.R. 6671:** Clean Fuels Deployment Act
- » **H.R. 6800:** HEROES Act
- » **H.R. 8371:** Next Generation Fuels Act
- » **H.R. 8759:** Bill to expedite cellulosic biofuel registrations
- » **H.R. 8995:** SCALE Act

- ✓ **8,000+ LETTERS** to Members of Congress from biofuels advocates
- ✓ **255 MEETINGS** with Members of Congress
- ✓ **230+ OP-EDS** and letters to the editor placed
- ✓ **23 EVENTS ATTENDED** on administration visits to battleground states
- ✓ **13 LETTERS** to Congress on priority issues
- ✓ **13 PANELS** and town halls on key issues
- ✓ **12 FOREIGN TRADE MISSIONS** to 5 countries
- ✓ **11 PRO-ETHANOL** bills in Congress
- ✓ **11 INDUSTRY-LED** letters
- ✓ **6 FORMAL MEETINGS** with EPA officials on RFS integrity
- ✓ **Field team engagement in 5 STATES**
- ✓ **Testified at 3 EPA HEARINGS**

POSITIONING CLIMATE AS A HUMAN HEALTH SOLUTION

Throughout 2020, Growth Energy never missed a chance to showcase biofuels as the premier climate and human health solution – one that is available today, compatible with our existing auto fleet, and affordable for communities around the world. Specifically, we:

- » Offered testimony to the EPA's COVID-19 Review Panel urging regulators to examine the impact of toxic gasoline additives on respiratory health and the potential benefits of higher ethanol blends.
- » Promoted the inclusion of biofuels in reports released by Democrat leaders on both the U.S. House Select Committee on the Climate Crisis and U.S. Senate Special Committee on the Climate Crisis.
- » Submitted six comments on climate plans and consideration of low carbon fuel standards in California, Washington, Colorado, and Puget Sound. Submitted comments to EPA on the importance of a positive F-factor to incentivize future production of flexible fuel vehicles.
- » Participated in two Canadian Clean Fuel Standard Workshops to help shape their climate program to include biofuels.
- » Engaged several environmental non-profit groups on discussions on federal climate policies.

CALIFORNIA

- » Submitted Tier 1 multi-media evaluation
- » Initiated Tier 2 tailpipe and evaporative emissions testing

IOWA

- » Supported Iowa 5-cent tax differential for E15 and higher blends

MINNESOTA

- » Endorsed statewide E15 initiative from the Governor's Council on Biofuels

KENTUCKY, GEORGIA, & OHIO

- » Supported efforts to incentivize growth of E15 with comments and testimony

ACCELERATING E15 THROUGH REGULATORY ACTION

State Priorities

Following EPA's approval for year-round E15, Growth Energy immediately pivoted to breaking down other barriers to new markets across multiple states – an effort that included five regulatory comments to EPA, heavy engagement with our U.S. Senate champions on E15 labeling and infrastructure, and a continued drumbeat of communications designed to educate stakeholders on the need for action.

PREPARING FOR AN INCOMING ADMINISTRATION

Leading up to the 2020 election, we prepared for all political outcomes by forging relationships and developing collateral to engage the winning candidate's team.

We worked closely with key influencers to involve both the candidate and his advisors. That work paid off with a visit to one of our member plants where then-candidate Joe Biden saw firsthand how our industry works every day to boost rural economies, while reducing the burden on our environment. It's also what secured biofuels' inclusion in both his rural and climate plans.

In the midst of a presidential primary and during the 2020 Iowa Caucuses, Growth Energy worked to secure an on-the-record statement from then-candidate Joe Biden in support of biofuels, as well as critical commitments on our priorities – including putting an end to SRE abuse.

“[Trump’s] reckless, unnecessary trade war and Big Oil ethanol waivers have decimated Iowa farmers and producers – evaporating livelihoods and exacerbating a tragic spike in farm bankruptcies.”

– Candidate Joe Biden
Des Moines Register, Jan. 6, 2020

Once the general election was behind us, we shifted to engaging those who would be shaping the incoming administration and key policy priorities. We developed an in-depth transition memo for the Biden transition team, and secured a meeting to brief the team on our priorities and establish our value in helping deliver on President Biden's climate goals. And we didn't stop there.

BIDEN'S RURAL PLAN

“Promote ethanol and the next generation of biofuels. Biden believes renewable fuels are vital to the future of rural America – and the climate. As part of his R&D investment, Biden will invest in developing the next generation of biofuels. Biden will invest in research to develop cellulosic biofuels in a manner that protects our soil and water and addresses the challenge of climate change, while turning grass, crop residues, and other biomass into fuel.

Doubling down on these liquid fuels of the future will not only make value-added agriculture a key part of the solution to climate change – reducing emissions in planes, ships, and other forms of transportation – but will also create quality jobs across rural America. From day one, President Biden will use every tool at his disposal, including the federal fleet and the federal government's purchasing power, to promote and advance renewable energy, ethanol, and other biofuels.”

Growth Energy staff member Majda Olson, Secretary Tom Vilsack, then-presidential candidate Joe Biden, former Iowa Lieutenant Governor Patty Judge, and Growth Energy Board Member Jim Leiting tour Big River Resources in Iowa.

BIDEN
PRESIDENT

BIDEN'S CLIMATE PLAN

“Doubling down on the liquid fuels of the future, which make agriculture a key part of the solution to climate change. Advanced biofuels are now closer than ever as we begin to build the first plants for biofuels, creating jobs and new solutions to reduce emissions in planes, ocean-going vessels, and more.”

We also developed positioning, policy, and messaging for Growth Energy and our members to be ready on “Day One” of the new administration. These outlined the role our industry plays in decarbonizing the transportation sector, fueling rural economies, and ameliorating health outcomes for all Americans. All of these efforts positioned Growth Energy to immediately begin leading on our administrative and regulatory requests heading into the new administration.

DRIVING ECONOMIC RECOVERY

As fuel markets collapsed and biofuel plants shuttered, the Growth Energy government relations team worked to relay the pandemic's impact on not only our industry, but the entire ag supply chain. This provided a timely opportunity to share with Members of Congress the importance of ethanol's co-products, such as carbon dioxide and hand sanitizer. We worked with our champions in Congress, including Sen. Amy Klobuchar (D-Minn.) and Sen. Chuck Grassley (R-Iowa) and Rep. Collin Peterson (D-Minn.), who fought for provisions in aid packages that included relief for biofuels. On December 22, Congress passed the final relief bill for 2020, which included \$13 billion for USDA to support our farmers and ag sector. The law specifically allows for payments to producers of advanced biofuel, biomass-based diesel, cellulosic biofuel, conventional biofuel, or renewable fuel.

The Growth Energy government and public affairs teams highlighted all of these benefits to federal lawmakers throughout the year as we:

- » Worked with the office of Vice President Mike Pence to provide strategic industry insight on CO₂ supply shortage.
- » Joined leading ag and biofuel groups in sending a joint letter to House and Senate leadership urging for COVID-19 relief for the biofuels industry.
- » Worked with our members and key stakeholders to secure signatures of 70 mayors across 10 states to reject the oil-state governors request for biofuel blending waivers for refiners due to COVID-19.
- » Led a letter to the U.S. House Committee on Energy and Commerce supporting a carbon capture amendment, which ultimately passed through a House energy package.
- » Worked with regulators to ensure that biofuel producers were classified as essential workers under federal guidelines.

MEDIA
SNAPSHOT

187
INTERVIEWS WITH SENIOR STAFF

3,800+
MENTIONS IN THE PRESS

In October 2020, Growth Energy sponsored a virtual townhall hosted by AgWeb's Chip Flory, where CEO Emily Skor and NCGA President John Linder shared their vision on how corn growers and biofuel producers can work together to unleash the power of ethanol.

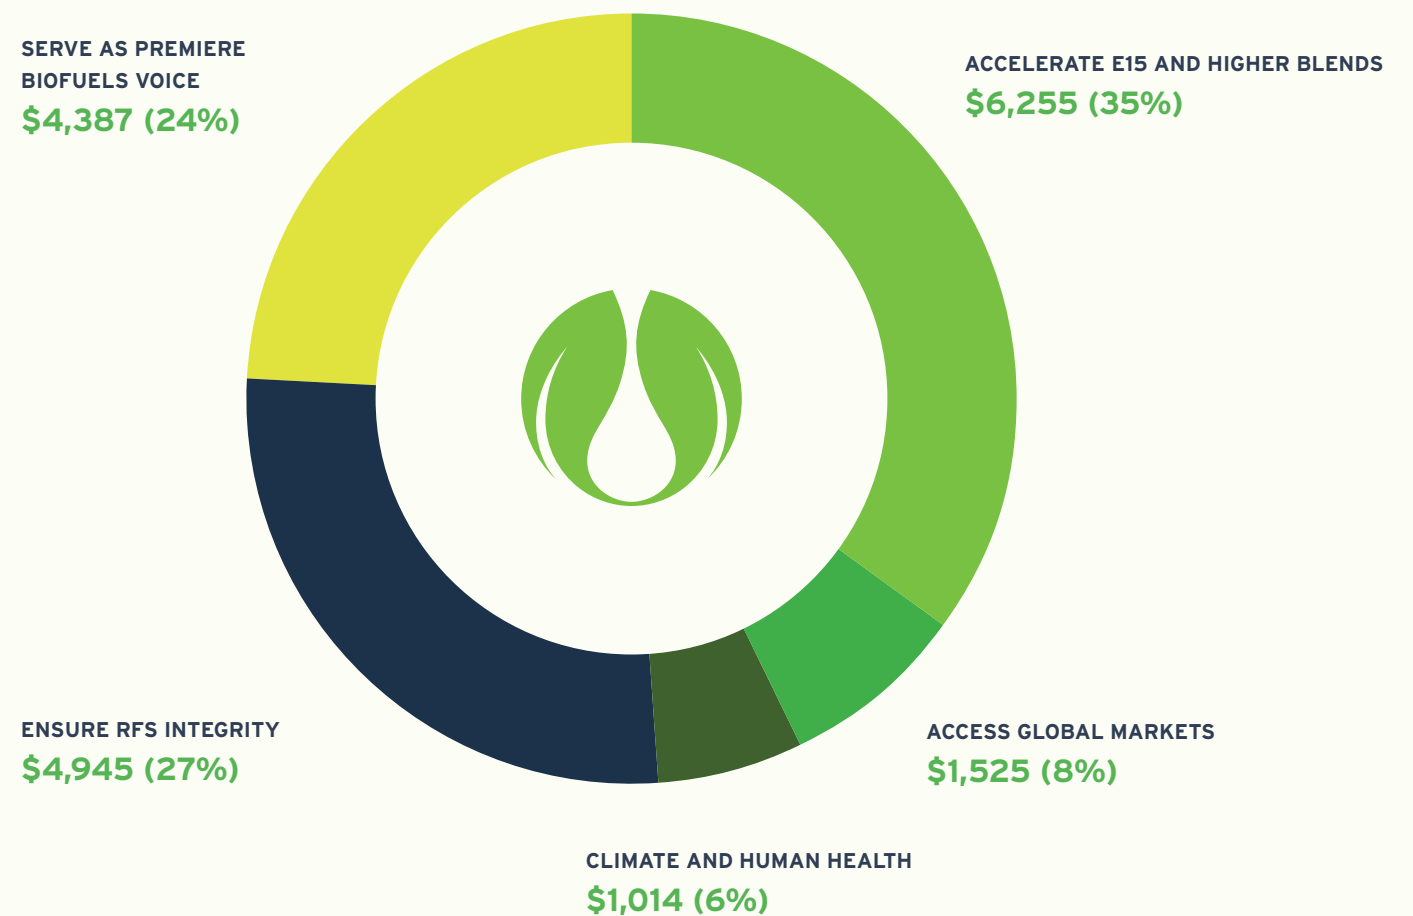

2020 FINANCIAL SUMMARY

RESPONSIBLE STEWARDSHIP OF RESOURCES

- » Ensured uninterrupted operations during the pandemic by implementing our internal Communicable Disease Policy and Preparedness Plan
- » Protected assets and leveraged budget saving opportunities
- » Balanced the budget by trimming 23% in expenses to address a \$6 million revenue shortfall

2020 ACTUAL EXPENSE BY STRATEGIC PRIORITY

TOTAL BUDGET: **\$18,126,000**

Figures are in thousands and include an allocation of staff time.
